

BBS Olympic Barrier

A highly visible safety barrier for construction and utility applications

The BBS Olympic Barrier is a complete versatile system, incorporating hinged side panels designed to rotate and self-lock at every 90°. This allows contractors to create configurations from 1250mm length to 2000mm length for the protection of temporary pathway excavations and road works of all kinds.

Features:

- Side panels fold for easy transport where space is limited (40 barriers to One Oversized Pallet)
- Side panels rotate and lock at 90°
- Side Panels can be used as door access
- Sliding linking clips to extend barrier
- Feet can swivel 360°
- Available in various colours
- Fixing area for courtesy board

Standards:

- Conforms to **BSEN8442** & **BSEN12899-1** (Reflectivity)
- Chapter 8 – The Traffic Signs Manual
- The Red Book 2013
- Traffic Signs Regulations & General Directions

Barrier Specifications:

Height:	1.02m	Length:	1.25m - 2.0m
Depth:	0.5m	Weight:	12.2kg
